

# Using MPD218 with Ableton Live

## 1. Download MPD218 - Editor for your OS

[MPD218 - Editor](#)

## 2. Send presets to Hardware

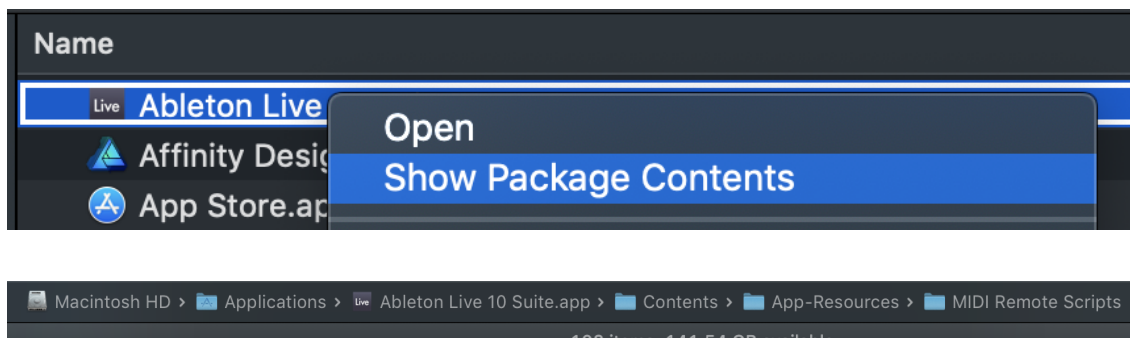

I used slot 1 and 2

*1 for knobs (PRG + Pad 1)*

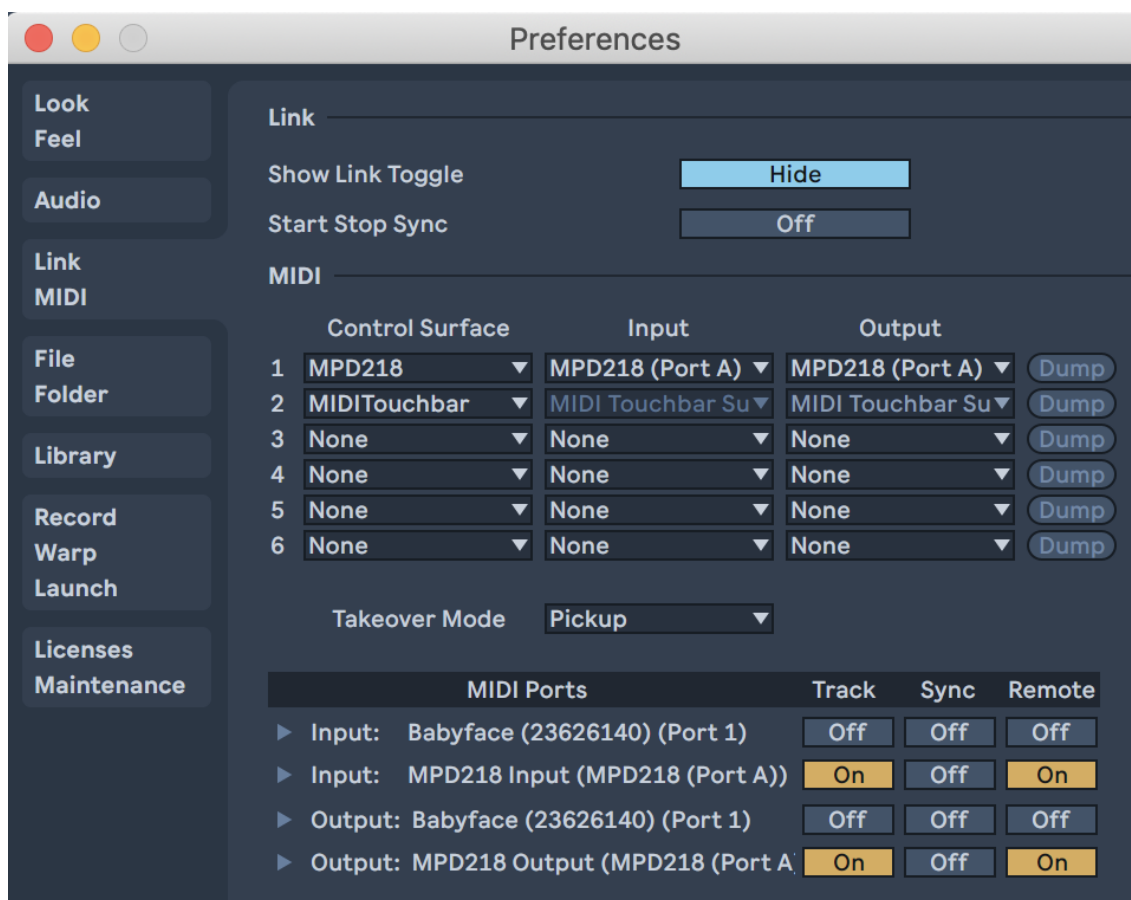

*2 for sliders (PRG + Pad 2)*

## 3. Copy MPD218 folder into "MIDI Remote Scripts"-Folder

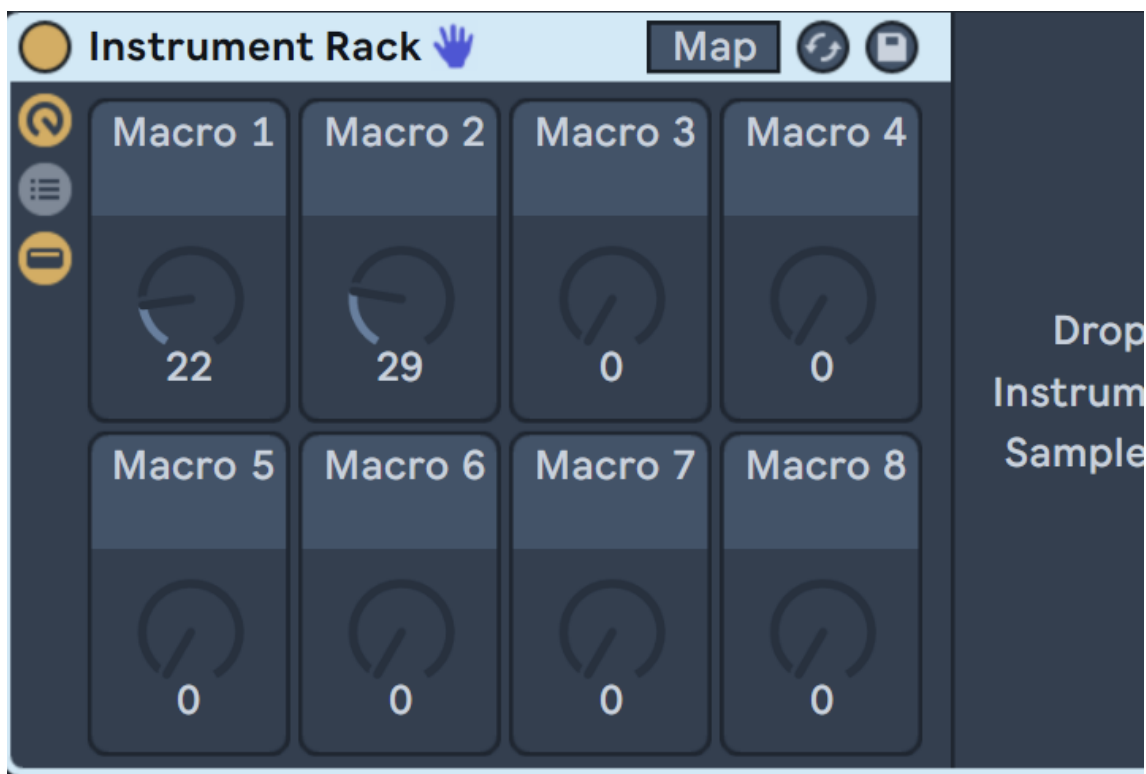

#### 4. Open Ableton and set settings

#### 5. Send presets to Hardware

- a) (PRG + Pad 1) Knob-Preset (knobs control the 8 macros, or whatever ableton automaps)

b) (PRG + Pad 2) Slider-Preset (knobs control sliders)

Make music, get into flow, enjoy.
